

# INDEXES

## Extracted from

### *Early History of the Town of Warwick, RI*

These four indexes are included in the version of this book that is included in its entirety on the CD-ROM *Rhode Island Collection #1: Warwick and south*, published by [Between the Lakes Group LLC](http://www.betweenthelakes.com).

We provide these indexes here for your use in determining whether the CD-ROM – including the full text of the book -- might be helpful to you in your research.

The four indexes are:

1. Subject index
2. Index of place names
3. Index of people
4. Index of Indians

A note:

We at Between the Lakes Group find it as peculiar as you no doubt do that the compilers of the original indexes thought it appropriate to segregate Caucasians and Native Americans in separate indexes. However, we are not privy to their thought processes, and can only assume that the compilers had their reasons, peculiar as they would seem today, more than 80 years following the original publication.
